

USDPROP Deployment Log

Operational deployment record for the USDPROP Polygon mainnet contract stack. This document intentionally omits deployer, execution-agent, administrative-agent, KYC-issuer, NAV-agent and Safe-owner wallet addresses. Contract addresses remain published for technical verification.

Document scope

Field	Value
Network	Polygon mainnet
Chain ID	137
Deployment timestamp	2026-05-20T19:24:58.692Z
Settlement asset	Native Polygon USDC, 0x3c499c542cEF5E3811e1192ce70d8cC03d5c3359
Treasury	Safe multisig, 7 configured signers, 5 signatures required
Initial NAV reference	0.1 USDC equivalent, represented with 6-decimal precision

Governance update record

The initial deployment artifact recorded overlapping administrative and NAV authority and a Safe threshold of 2 of 3. Operational scripts were used to separate NAV authority from administrative authority and update Safe governance to 5 of 7. This update is recorded without publishing agent wallet addresses.

Deployment sequence

Step	Component	Deployment / wiring action
1	ClaimTopicsRegistry	Initialized and claim topics configured: KYC, country, AML / eligibility topics.
2	TrustedIssuersRegistry + ClaimIssuer	Trusted issuer registry initialized and ClaimIssuer connected for identity claim issuance.
3	IdentityRegistryStorage	Identity storage initialized for wallet-to-identity registry records.
4	IdentityRegistry	Identity registry initialized and storage binding completed.
5	ModularCompliance	Compliance controller deployed.
6	USDPROPComplianceModule	USDPROP compliance module deployed and later bound to token and distributor.
7	USDPROP Token	ERC-3643 token deployed and wired to registry and compliance components.
8	NAVOracle	NAV oracle deployed with initial NAV value configured.

Step	Component	Deployment / wiring action
9	Safe Treasury	Safe treasury configured with 7 signer seats and 5-signature execution threshold.
10	InvestmentManager	Investment flow executor deployed and connected to token, USDC and NAV dependencies.
11	DividendDistributor	Distribution accounting and settlement contract deployed.
12	Contract wiring	Token, compliance, investment and dividend dependencies connected.
13	Compliance setup	Default jurisdiction settings and investor limits configured.
14	Hardening and post-wiring checks	Ownership/control moved to Safe governance where applicable; sanity checks passed.
